PROFESSIONAL SUMMARY

A passionate and dedicated aspiring web and mobile developer with a strong interest in building practical, user-focused digital solutions. Eager to learn, adapt, and contribute to real-world projects through low-code platforms, web development, and workflow automation.

EXPERIENCE

A. Magsaysay, Inc	2025-2026
Software Developer	
- Contributed to the development of a WordPress-based system for Fairex Trading Asia Corporation (FTAC) - Developed a comprehensive WordPress-based solution for Magsaysay MOL Ship Management, improving operational efficiency and client satisfaction. - Designed and implemented a workflow and data management system for Magsaysay Holder Insurance Brokers Inc. using Microsoft Power Platform, resulting in streamlined business processes and improved data handling. - Collaborated with enterprise developers on an ongoing Microsoft Power Platform project involving Power Apps, Power Automate, and SharePoint, gaining significant experience in workflow automation and system integration. - Provided continuous support and maintenance for existing Power Platform solutions, ensuring applications remained scalable, secure, and optimized.	

PROJECTS

FindLink: An OCR and Rule-Based NLP System for Enhanced Missing Person Case Management	2024-2025
Technologies: React.js (Vite), Flutter, Firebase, Google Cloud APIs (Vision API, Maps API), Rule-based NLP (Regex)	
Developed a cross-platform mobile and web-based case management system that automates manual processes, supports real-time case tracking, and validates reports using OCR and regular expressions to improve accuracy and efficiency in case handling.	
Implementing the Random Forest Classifier for Plant Categorization in the Philippines' Bureau of Plant Industry	2025
Technologies: Python Jupyter Notebook, Kaggle	
- Developed and trained machine learning models using Python in Jupyter Notebook, utilizing datasets sourced from Kaggle for data preprocessing, analysis, and testing. - Developed a machine learning model using the Random Forest Classifier to automate plant species categorization, achieving over 78% classification accuracy and improving data management efficiency for the Bureau of Plant Industry.	
V2 Pet: Pet Health our Priority	2025
Technologies: Flutter (dart), Supabase (PostgreSQL database, REST API, authentication)	
Developed a pet health management system for tracking vaccinations, fertility cycles, breeding records with litter size estimation, medications, pet profiles, community feed, and nearby clinic listing.	

EDUCATION

National University Dasmariñas	2022-2026
Bachelor of Science in Information Technology Specialization: Mobile and Web Applications	
St. Edward School, Lancaster New City	2020-2022
Senior High School	

TECHNICAL SKILLS

- Programming Languages: JavaScript, PHP, Dart
- Frontend: React.js, HTML, CSS
- Mobile Development & Low-Code Development: Flutter, Microsoft Power Apps
- CMS & Platforms: WordPress, SharePoint
- Databases: MySQL, Supabase, Firestore
- Automation: Power Automate
- Tools: Git, GitHub, Firebase, Figma, VS Code, Postman, phpMyAdmin, Microsoft Power Platform

CERTIFICATIONS & TRAINING

- 8th ICoDSA International Conference 2025 (Scopus-Indexed)
- SYNC Foundations – Building Skills, Building Minds. CIT Congress 2025
- Code to Deployment: Streaming Software Development with Microsoft Azure DevOps
- Modern Web + AI (UI/UX)
- Digital Startup Development and Acceleration Program
- Cybersecurity Orientation by DICT Region IV-A
- eGOVPH Super App Orientation – DICT Region IV-A
- iSITE 1 Virtual Conference: Interpersonal Skills for IT Enthusiasts

AWARDS & ACHIEVEMENTS

- Dean's List (4 Semesters), A.Y. 2023–2026
