PROFESSIONAL SUMMARY

A passionate and dedicated aspiring web and mobile developer with a strong interest in building practical, user-focused digital solutions. Eager to learn, adapt, and contribute to real-world projects through low-code platforms, web development, and workflow automation.

TECHNICAL SKILLS

Programming Languages: JavaScript, PHP, Dart
Frontend: React.js, HTML, CSS
Mobile Development & Low-Code Development: Flutter, Microsoft Power Apps
CMS & Platforms: WordPress, SharePoint
Databases: MySQL, Supabase, Firestore
Automation: Power Automate
Tools: Git, GitHub, Firebase, Figma, VS Code, Postman, phpMyAdmin, Microsoft Power Platform

EXPERIENCE

Software Developer, A. Magsaysay, Inc. — Manila, Philippines | Nov 2025 - Apr 2026

- Contributed to the development of a WordPress-based system for Fairex Trading Asia Corporation (FTAC).
- Developed a comprehensive WordPress-based solution for Magsaysay MOL Ship Management, improving operational efficiency and client satisfaction.
- Designed and implemented a workflow and data management system for Magsaysay Holder Insurance Brokers Inc. using Microsoft Power Platform, resulting in streamlined business processes and improved data handling.
- Collaborated with enterprise developers on an ongoing Microsoft Power Platform project involving Power Apps, Power Automate, and SharePoint, gaining significant experience in workflow automation and system integration.
- Provided continuous support and maintenance for existing Power Platform solutions, ensuring applications remained scalable, secure, and optimized.

EDUCATION

Bachelor of Science in Information Technology, Specialization in Mobile and Web Application

National University - Dasmariñas, Cavite, Philippines | 2022-2026

Dean's List (4 Semesters), A.Y. 2023-2026

Senior High School

St. Edward School - Lancaster New City | 2020-2022

PROJECTS & RESEARCH

FindLink: OCR and Rule-Based NLP System for Missing Person Case Management (2024 - 2025)

React.js (Vite), Flutter, Firebase, Google Cloud APIs (Vision, Maps), Rule-based NLP (Regex)

- Built a cross-platform mobile and web case management system that automates manual processes, supports real-time case tracking, and validates reports using OCR and regular expressions to improve accuracy and efficiency in case handling.

Random Forest Classifier for Plant Categorization, Philippine Bureau of Plant Industry (2025)

Python, Jupyter Notebook, Kaggle

- Developed and trained a Random Forest model to automate plant species categorization, achieving over 78% classification accuracy; presented at the ICoDSA 8th International Conference 2025, Indonesia (Scopus-indexed).

V2 Pet: Pet Health Our Priority (2025)

Flutter (Dart), Supabase (PostgreSQL, REST API, authentication)

- Built a pet health management system tracking vaccinations, fertility cycles, breeding records with litter size estimation, medications, profiles, community feed, and nearby clinic listings.

CERTIFICATIONS & TRAINING

- Presenter & Appreciation, 8th ICoDSA International Conference 2025 (Scopus-Indexed), Jakarta, Indonesia - Jul 2025
- SYNC Foundations: Building Skills, Building Minds, CIT Congress 2025 - May 2025
- Completion, Code to Deployment: Streaming Software Development with Microsoft Azure DevOps - Apr 2025
- Completion, Modern Web + AI (UI/UX) - Apr 2025
- Digital Startup Development and Acceleration Program
- Cybersecurity Orientation, DICT Region IV-A - May 2024
- eGOVPh Super App Orientation, DICT Region IV-A
- iSITE 1 Virtual Conference: Interpersonal Skills for IT Enthusiasts
- HTML Essentials, Cisco Networking Academy - July 2026
