

KERUB M. SAQUISAME

Software Developer | QA / Manual Testing

+63 9477 804 7833 | saquisamekerubm@gmail.com | Portfolio: kerportfolio.vercel.app

PROFESSIONAL SUMMARY

Software Developer with hands-on experience building web and mobile applications using React.js, Flutter, and enterprise low-code platforms including Microsoft Power Platform. Experienced in converting business requirements into working solutions, and in applying manual testing practices — test case design, functional and UI validation, and defect verification — to ship reliable, well-tested software.

TECHNICAL SKILLS

- Languages & Frontend: JavaScript, PHP, Dart, React.js, HTML, CSS, Flutter
- Platforms & Databases: WordPress, SharePoint, Microsoft Power Platform, MySQL, Supabase, Firestore
- Tools: Git, GitHub, Firebase, Figma, VS Code, Postman, phpMyAdmin, Google Lighthouse

QA & TESTING SKILLS

- Manual testing: functional, UI, and validation testing across web and mobile applications
- Test case design with defined pass/fail criteria; defect validation against expected results
- API testing support (Postman); database-level validation (phpMyAdmin, MySQL, Supabase, Firestore)
- Performance/accessibility checks (Google Lighthouse); version control and issue tracking (Git, GitHub)

EXPERIENCE

- Software Developer** — A. Magsaysay, Inc. — Manila, Philippines *Nov 2025 – Apr 2026*
- Developed and maintained Microsoft Power Platform solutions (Power Apps, Power Automate, SharePoint), aligning functionality with business requirements
 - Built and maintained WordPress-based systems for FTAC and Magsaysay MOL Ship Management, ensuring pages and forms functioned reliably before release
 - Designed and implemented a workflow and data management system for Magsaysay Holder Insurance Brokers Inc. using Microsoft Power Platform
 - Collaborated with enterprise developers on a Power Platform project (Power Apps, Power Automate, SharePoint), incorporating manual testing to verify functionality prior to deployment

PROJECTS & RESEARCH

- FindLink: OCR and Rule-Based NLP System for Missing Person Case Management** — React.js, Flutter, Firebase, Google Cloud APIs *2024 – 2025*
- Built OCR extraction and rule-based NLP features for case tracking across web and mobile builds using React.js, Flutter, and Firebase
 - Applied manual testing methodology — pass/fail test scenarios — to validate OCR and case-tracking behavior, identifying and resolving data-validation issues
- Random Forest Classifier for Plant Categorization** — Philippine Bureau of Plant Industry — Python, Jupyter, Kaggle *2025*
- Trained a Random Forest model in Python achieving 78%+ classification accuracy; validated outputs against labeled test data
 - Presented findings at ICoDSA 2025 (Scopus-indexed)
- V2 Pet: Pet Health Our Priority** — Flutter (Dart), Supabase *2025*
- Built and tested a pet health management system covering vaccinations, medications, profiles, and clinic listings

EDUCATION

- BS Information Technology, Spec. in Mobile and Web Application** — National University — Dasmariñas, Cavite *2022 – 2026*
- Dean's List (4 Semesters), A.Y. 2023–2026

CERTIFICATIONS & TRAINING

- Presenter, 8th ICoDSA International Conference 2025 (Scopus-Indexed), Jakarta, Indonesia — July 2025
- Code to Deployment: Streaming Software Development with Microsoft Azure DevOps — April 2025
- Modern Web + AI (UI/UX) — April 2025
- Cybersecurity Orientation, DICT Region IV-A — May 2024
- HTML Essentials, Cisco Networking Academy — July 2026
