

KERUB M. SAQUISAME

QA / Manual Tester

+63 9477 804 7833 | saquisamekerubm@gmail.com | Imus City, Cavite, Philippines

PROFESSIONAL SUMMARY

Detail-oriented aspiring QA Tester with hands-on experience in manual testing, including designing pass/fail test scenarios and validating actual system outcomes against expected results. Background as a software developer provides a strong technical foundation for reading requirements, understanding system behavior, and communicating defects clearly to development teams.

QA & TESTING SKILLS

- Manual testing: functional, UI, and validation testing across web and mobile applications
- Test case design with defined pass/fail criteria; defect validation against expected results
- API testing support (Postman); database-level validation (phpMyAdmin, MySQL, Supabase, Firestore)
- Performance/accessibility checks (Google Lighthouse); version control and issue tracking (Git, GitHub)

TECHNICAL SKILLS

- Languages & Frontend: JavaScript, PHP, Dart, React.js, HTML, CSS, Flutter
- Platforms & Databases: WordPress, SharePoint, Microsoft Power Platform, MySQL, Supabase, Firestore
- Tools: Git, GitHub, Firebase, Figma, VS Code, Postman, phpMyAdmin, Google Lighthouse

EXPERIENCE

- Software Developer** — *A. Magsaysay, Inc. — Manila, Philippines* Nov 2025 – Apr 2026
- Provided support and maintenance for Power Platform solutions, routinely verifying behavior against business requirements
 - Contributed to WordPress-based systems for FTAC and Magsaysay MOL Ship Management, checking pages and forms for functional accuracy before release
 - Designed and implemented a workflow and data management system for Magsaysay Holder Insurance Brokers Inc. using Microsoft Power Platform
 - Collaborated with enterprise developers on a Power Platform project (Power Apps, Power Automate, SharePoint)

PROJECTS & RESEARCH

- FindLink: OCR and Rule-Based NLP System for Missing Person Case Management** — *React.js, Flutter, Firebase, Google Cloud APIs* 2024 – 2025
- Performed manual testing, designing test scenarios with pass/fail criteria to verify OCR extraction and case tracking behaved as expected
 - Validated actual system outcomes against expected results across web and mobile builds, identifying OCR and data-validation discrepancies
- Random Forest Classifier for Plant Categorization** — *Philippine Bureau of Plant Industry — Python, Jupyter, Kaggle* 2025
- Trained a Random Forest model achieving 78%+ classification accuracy; validated outputs against labeled test data; presented at ICoDSA 2025 (Scopus-indexed)
- V2 Pet: Pet Health Our Priority** — *Flutter (Dart), Supabase* 2025
- Built and tested a pet health management system covering vaccinations, medications, profiles, and clinic listings

EDUCATION

- BS Information Technology, Spec. in Mobile and Web Application** — *National University – Dasmariñas, Cavite* 2022 – 2026
- Dean's List (4 Semesters), A.Y. 2023–2026

CERTIFICATIONS & TRAINING

- Presenter, 8th ICoDSA International Conference 2025 (Scopus-Indexed), Jakarta, Indonesia — July 2025
- Code to Deployment: Streaming Software Development with Microsoft Azure DevOps — April 2025
- Modern Web + AI (UI/UX) — April 2025 | Cybersecurity Orientation, DICT Region IV-A — May 2024
- HTML Essentials, Cisco Networking Academy — July 2026
